

Jio's SD-WAN (Software defined WAN) is a business-class, secure, and simple Cloud-enabled WAN solution which brings together Apps, network and security at the edge. SD-WAN enables multiple functionalities like routing, firewall, load balancing and WAN optimization to get integrated on a single hardware thus simplifying network. All the features and functionality of SD-WAN are controlled from the central location to provide end-to-end managed services.

What You Get

Multi-function CPE

Addresses multiple networking, routing and security requirements

Zero Touch Provisioning (ZTP)

For quick provisioning & application of common policy across all locations

Underlay Agnostic Service

Combines multiple connectivity like ILL, MPLS, Broadband and LTE into a single-network

Link Aggregation

Merges multiple links into a single high-speed link to ensure optimum utilization of network

Link Failover

Enables auto-switchover to a stable link without any human intervention

Application Aware Routing

Advanced application aware routing with visibility of 4500+ application

Packet Duplication

Data traffic travel on two different paths to ensure zero packet loss

Stateful Firewall

For integrated security policy to prevent threats based on traffic patterns and flows

Managed Services

Configuration, policy management, proactive monitoring, notification and advance reporting

Digital Self-Care

Intuitive digital portal to securely manage your account

Jio Advantage

Single CPE

Single CPE with ZTP will simplify order to activation and quick delivery cycles

Remote Management

Remote management of SD-WAN solution thus reducing field visit and improved service assurance

Cloud Connectivity

Seamless access to cloud application with local internet breakout coupled with enhanced performance and visibility

Multi Cloud Ready Network

Seamless connect to IaaS, SaaS clouds using secure network

Opex Based Model

Simple rental-based model with option to have multiple billing periodicities as needed

End-to-end Management

Service backed with 24x7 managed service operation centre
