

IP Centrex solution from Jio is a service where the functionalities of a PBX are simulated on the Cloud to provide a highly scalable and cost-effective Enterprise voice communication solution for your business.

With IP Centrex you can enjoy features like HD voice calling over fixed line network for on-net calling. You can have your own Private Numbering Plan (Intercom dialing) within your office Centrex User Group, completely free of charge. IP Centrex can also facilitate Fixed Mobile Convergence (FMC) for integrated connectivity between fixed and wireless telecommunication networks. This service gives you freedom from worries of technology obsolescence as Jio takes care of all technology upgrades at no additional cost.

What You Get

Call Transfer

Transfer calls to any other user within the same Centrex group

Call Hold

Retain an existing call while accepting or dialing another call using the same end instrument
