

JioThings Smart Connected Coolers offers an end-to-end solution for retailers, bottlers and FMCG companies by providing an economical yet efficient IoT solution. NB-IoT enabled telemetry devices are powered with edge algorithms and they integrate with all coolers (including retrofit coolers). Temperature and door sensors help in getting real-time updates on critical parameters of operation. JioThings Cloud platform aids in monitoring thousands of coolers in a single dashboard with details about location, operating conditions and tamper alerts, etc. in a secured manner.

What You Get

**Tracking of Missing Coolers**  
GPS and cell-based tracking options to avoid thefts, misuse or abuse, thus helping in easy audits

**Quality Assurance**  
With real-time temperature monitoring and alerts, you can stay assured of the functioning

**Cooler Status Monitoring**  
Power cycle monitoring ensures adherence to operating norms

**Theft and Tamper Protection**  
Detect movement with accelerometer to monitor any change in placement from pre-decided strategic locations

**Reduced Downtime**  
Monitor critical parameters 24x7 ensuring predictive and preventive maintenance

**Alerts and Notifications**  
Get notified about anomalies in operating conditions with real-time temperature, door open and tamper alerts

**Reporting and Analytics**  
Access to intuitive user interface with comprehensive reporting and visualizations. Alerts and notifications help 'Managing by Exception'

**Sales Analysis**  
Analyse co-relation between open/ close door and sales with door sensors connected to telemetry devices

**Field Staff Monitoring**  
Manage productivity by tracking visits of sales and service personnel using Bluetooth enabled telemetry device

**24x7 Assisted Care**  
Ready to service your needs at all times

Jio Advantage

**Pan India NB-IoT Connectivity**  
Jio's NB-IoT network is available Pan India and covers 95%+ census population

**One-Stop Solution**  
Get everything from hardware, connectivity, IoT cloud platform to installation and after sales services

**Accessories**  
Includes highly accurate temperature and door sensor for monitoring temperature along with features to check door status and power status of the cooler

**Telemetry Device**  
Ruggedized IoT telemetry device with IP65 enclosure. Features include GPS, general purpose IO's for sensor inputs, serial port communication and edge computing processing
