SMART FLEET MANAGEMENT

End-to-end vehicle telematics and monitoring solutions bundled with new age analytics, critical alerts and business reporting services

JioThings Smart Connected Vehicle solution is a combination of hardware, software and connectivity solutions designed to remotely track and manage your fleet. It allows you to gain better visibility of your vehicles, consignments and drivers thereby reducing uncertainties and cost. This solution is designed to improve productivity and efficiency of your business.

Additionally, an intuitive web portal and app is available to help you effectively manage and monitor your vehicles. Connected Vehicle solution enables you to use data received from Jio's trackers to get real-time insight into location tracking, vehicle utilization, monitor driver behaviour and improve both performance and security.

What You Get

Location Tracking
Real time tracking, instant alerts and notifications to know your vehicle status

Route Management Service
Single click Geo-fencing, multi-stop routes, trip assignments and more

Data Storage and Management Service
Manage, store and retrieve historic data of any asset through multiple modes like dashboard, reports and APIs

Multi Sensor Integration
External sensors like fuel, pressure, temperature and humidity sensors, RFID, etc. for VAS can be integrated resulting in fuel saving, preventive maintenance, higher security and so on

Vehicle Telematics and Diagnostic Services
Understand the health of your vehicles and take proactive action to avoid service disruption, asset losses and unnecessary costs

Driver Behaviour and Management
Understand and analyse the driving behaviours to make your fleet efficient and goods safe

Insights and Data Analytics Services
Get detailed insights from near real-time data to take actions in time

AIS 140 Certified
ARAI certified for AIS 140 compliance and suitable for public and national permit vehicles

24x7 Assisted Care
Ready to service your needs at all times

Jio Advantage

Pan India 4G LTE Connectivity
Jio's 4G network is available Pan India and covers 95%+ census population

One-Stop Solution
Get everything from hardware, connectivity, IoT cloud platform to installation and after sales services

Accessories
Easy integration with various external sensors and peripherals

Telemetry Devices
Ruggedized IoT telemetry device. Features include GPS, general purpose IO's for sensor inputs, serial port communication and edge computing processing
